PERSONAL STATEMENT

Aspiring Web Developer looking for professional experience in the field. Currently studying BSc Multimedia Technology & Design at the University of Kent, Canterbury. Always one step ahead of the course - most of my technical skills are self-taught. I love writing code and finding simple solutions to complicated problems. I want to help make the web more functional, beautiful and accessible.

I posses good programming skills which can transfer into any language and, coupled with my innate ability to soak up knowledge, I can fit into any development project. Communication and teamwork are things I have no trouble with so don't hesitate to consider working with me!

EXPERIENCE

LAING O'ROURKE

- Design Team - 2 weeks - June '09
 - Worked on real projects
 - CAD software experience (design / rendering)
